PROFESSIONAL SUMMARY

Motivated Software Engineer and Computer Science student specializing in Front-End Development with React.js, and expanding expertise in Artificial Intelligence, Machine Learning, and Natural Language Processing (NLP). Experienced in building responsive, user-friendly web applications through a professional role at Tawr Company. Currently deepening knowledge in Deep Learning and Computer Vision, with a goal of creating scalable, data-driven applications that bridge modern front-end interfaces with AI technologies.

TECHNICAL SKILLS

- **Front-End Development:** HTML, CSS, Bootstrap, JavaScript, React.js
- **AI / Data Science:** Machine Learning, Natural Language Processing (NLP), Deep Learning, Computer Vision
- **Programming Languages:** Python, PHP, Java, C++, C#, SQL
- **Tools & Practices:** Git & GitHub, REST APIs, Responsive Design, Problem Solving

EXPERIENCE

Machine Learning Engineer Intern | Digital Egyptian Pioneer Initiative (DEPI) | 2025 – 2026

- Developed and trained machine learning models as part of Egypt's national digital transformation initiative
- Applied NLP and data preprocessing techniques to real-world datasets, contributing to AI-powered solutions
- Collaborated with peers on end-to-end ML pipelines covering data collection, feature engineering, model training, and evaluation

Front-End Developer | Tawr Company | 2025

- Built and maintained responsive, cross-browser web applications using HTML, CSS, JavaScript, and React.js
- Delivered user-friendly interfaces following modern UI/UX best practices, improving user engagement
- Worked within an agile team to implement new features and resolve bugs on a production codebase

EDUCATION

Bachelor of Science – Computer Science & Artificial Intelligence | Minia National University | 2023 – 2027 (Expected)

- Relevant coursework: Algorithms, Data Structures, Machine Learning, Artificial Intelligence, Databases

COURSES & TRAINING

- PHP Full-Stack Web Development (2023 – 2024)
- Problem Solving & Competitive Programming (2025 – 2026)
- Deep Learning (currently in progress)

KEY PROJECTS

React.js Web Application

- Designed and developed a fully responsive single-page application using React.js, implementing component-based architecture and state management for optimal performance

NLP / Machine Learning Model

- Built and evaluated an NLP classification model using Python (scikit-learn / NLTK), applying text preprocessing, feature extraction, and model optimization techniques

Full-Stack PHP Web Platform

- Developed a dynamic web platform with PHP back-end and MySQL database, implementing CRUD operations, authentication, and responsive front-end design

LANGUAGES

- Arabic – Native
- English – B1 (Intermediate)
